

Interview Performance Report

Candidate · Charge Nurse @ City General Hospital · April 29, 2026

B

75/100

Strong candidate — minor gaps to address.

■ Performance Summary

The candidate possesses strong foundational skills in emergency medicine and EHR, with some relevant interim leadership experience, but needs to demonstrate greater depth in leadership, delegation, and specific patient safety protocols for the Charge Nurse role. The candidate's strongest moment was clearly articulating proficiency with EHR systems, specifically Epic. The most important gap is developing and demonstrating comprehensive shift leadership and delegation strategies beyond interim experience.

■ Skill Evaluation

Skill	Rating	Score Bar
Patient safety protocols	Adequate	
RN License	Strong	
Electronic Health Records (EHR)	Strong	
Conflict resolution	Adequate	
Leadership	Adequate	
ACLS/BLS	Adequate	
Shift leadership and delegation	Adequate	

■ Strengths

- Extensive experience as an ER RN in high-volume environments, providing a strong clinical base for acute care.
- Proficiency with Electronic Health Records (EHR) systems, specifically Epic, which is critical for efficient record management and communication.
- Demonstrated interim leadership experience as an interim Charge Nurse, indicating a foundational understanding of charge nurse responsibilities.

■ Work On

- Leadership and Delegation Depth: While the candidate has interim experience, a full Charge Nurse role requires more proactive and strategic delegation, team oversight, and performance management. Action: Practice STAR method responses to detail how complex tasks were delegated, how team performance was monitored, and how staff were supported during challenging shifts.

- **Specific Patient Safety Protocols:** The candidate's ER experience implies exposure to safety protocols, but deeper elaboration on specific initiatives or responses to safety events is needed. Action: Research and prepare to discuss 2-3 specific patient safety protocols relevant to night shifts in an ER setting, including personal involvement.
- **ACLS/BLS Certification:** These essential certifications were not explicitly confirmed in the summary. Action: Provide proof of current ACLS and BLS certifications.

■ Expand On

- **Leadership and Delegation:** Expand from interim experience to proactive, strategic leadership. Focus on developing team members, managing workflow proactively, and making decisive operational decisions under pressure.
- **Patient Safety Protocols:** Move from awareness to active implementation and improvement. Demonstrate an understanding of root cause analysis for safety incidents and how to implement preventative measures effectively.
- **Conflict Resolution:** Deepen from basic handling to proactive identification and mediation strategies. Focus on resolving conflicts between staff members, with patients/families, and with physicians.

■ Recommended Next Steps

1. Complete a leadership training course focusing on delegation and team management in healthcare.
2. Review hospital-specific patient safety guidelines and best practices for emergency departments.
3. Engage in role-playing exercises to practice conflict resolution scenarios with different stakeholders (nurses, physicians, patients).
